

A.G. Edwards JA Finance Park

The perfect fit for your Personal Finance classes!

Two ways to experience it...

A Complete Curriculum

- Students complete a four-week, in-class personal finance curriculum that concentrates on budgeting. Lessons cover spending, debit cards, credit, saving, investing, taxes, salary, budgeting, and careers.
- Junior Achievement provides the curriculum materials, which includes training, a teacher guide, and workbooks for the students to keep.
- During a 4½ hour visit to JA Finance Park, students create a monthly budget based on an assigned personal income and family situation.
- The cost for this program is \$15 per student, and includes the visit day experience!

JA Finance Park in a Day: One-Day Program

We take what you are already teaching and bring it to life!

- JA Finance Park offers students an experiential education in personal finance through active participation in a simulated community.
- The JA Finance Park facility is divided into real-world businesses that represent budget categories from banking to utilities, housing to transportation, furniture to entertainment.
- Investing is stressed as students track the ups and downs of a stock portfolio.
- At the conclusion of the day, students pay their bills and adjust spending to balance their budgets.
- The cost for this experience is only \$10 per student.

Volunteers: Volunteers provide the students with help throughout the day, but they also bring their adult experiences to the students' experience on the visit day.

- High Schools are asked to secure one volunteer for every 8 to 10 students. This could be parents or additional staff.
- Volunteers receive training for their role either online or at our facility.

Account # 065	Life Situation	PIN # 5785
Ages of Children: NA		Age: 33
